

ACCELERATOR

Payara® Accelerator Services

Operational Training

The Payara® Platform - Production-Ready,
Cloud Native and Aggressively Compatible.

Datasheet

Introduction

An effective training strategy is important to ensure employees are equipped with the necessary skills to execute their tasks effectively in their organizations. Payara Accelerator Operational Training helps your employees get training directly from our expert team of consultants in the operational aspects of the Payara Platform to boost their productivity. Whether you just moved to Payara Enterprise and unsure where to start or are new to the world of enterprise middleware solutions, get a training solution tailored to your needs.

Whether you're unsatisfied with your existing production configuration knowledge or looking to enhance it for better stability, Payara Accelerator can provide the best training solution entirely customized to your requirements, roles, and system configuration. Operational training is delivered online using standard online conferencing tools like MS Teams, Zoom, Cisco Webex, etc.

The Payara Accelerator Approach to Training

Our training engagements can vary in length depending on your needs, but they all begin with a discovery consultation with a member of the Payara Accelerator team. We will work with your in-house team to assess your training needs and determine the next steps toward designing a detailed training schedule that will benefit your employee's professional development.

The Payara Accelerator Operational Training consists of dedicated training sessions where our consultants will teach selected engineers from your organization the following operational aspects of the Payara platform:

- Effective Payara Server Management:
 - Clustering (instances, data grid, deployment groups)
 - Network and Resource configuration (HTTP listeners, JDBC resources, etc.)
 - JMS Service and OpenMQ
 - Payara Insight
 - System services configuration.
- Effective Payara Micro Administration and Management
- HTTP Load balancing Setup

What is Payara Accelerator?

Available exclusively to Payara Enterprise customers, Payara Accelerator is a suite of services designed to optimize your Payara Enterprise deployment, migration, or business growth, through customized infrastructure improvements and solutions.

See the full range of services we offer [here](#).

Why Payara Enterprise?

Payara Enterprise is the best application platform for mission critical Jakarta EE (Java EE) and MicroProfile production systems.

Payara Server Enterprise supports reliable and secure deployments of Jakarta EE applications in any environment: on-premise, in the cloud, or hybrid.

Payara Micro Enterprise is the platform of choice for containerized Jakarta EE and MicroProfile microservices deployments. It provides a high performance and highly scalable platform built from the ground up for cloud and containers.

With Payara Enterprise, benefit from support direct from our Engineers, a 10 Year Software Lifecycle, guaranteed monthly releases, bug fixes, and patches, [and more](#).

Our customers include US Coast Guard, Rakuten Card, Hermes, DPD, Fujitsu UK and BMW Group.

Try Payara Enterprise for free [here](#).

Operational training doesn't include training in application development concepts or technologies, like teaching Jakarta EE or MicroProfile API usage or teaching proper Java coding standards.

Outcomes

Whatever your requirements, Payara Accelerator will work with you to design an operational training schedule that meets your needs.

We will make sure your team of engineers understands how to effectively manage their Payara Platform environments, while mitigating risk and working towards reducing service disruption. The training schedule and the contents discussed in the training will be summarized in a detailed report delivered to the customer at the end of the training sessions.

The result is an interactive and immersive learning experience.

How Do I Get Started?

Due to the bespoke nature of our services, contact us for more information and we'll create a custom package to suit you.

About Payara Services

We are a dedicated team of professionals devoted to open source, Java, Jakarta EE and MicroProfile.

As Contributing Members of the Eclipse Foundation, we invest our resources and expertise to improve, innovate and develop open source technologies. We are involved in shaping the future of the industry via our direct contributions to Jakarta EE (Payara's Founder and CEO, Steve Millidge, is a Project Management Committee member) and MicroProfile.
