

ACCELERATOR

Payara® Accelerator Services

Migration and Upgrade

The Payara® Platform - Production-Ready,
Cloud Native and Aggressively Compatible.

Datasheet

Introduction

Unleash the full potential of your applications with the Payara Accelerator migration and upgrade service, designed especially for Payara Server and Payara Micro (Payara Platform) and delivered by experienced Payara engineers and technical consultants.

If you have made the decision to migrate to Payara Enterprise, like in these scenarios:

- Migrating from another application server vendor, eg. GlassFish.
- Upgrade from an older version of Payara Enterprise to a newer version of Payara Enterprise
- Upgrade from an older or equivalent version of Payara Community to Payara Enterprise

Payara Accelerator offers expert guidance and assessment to ensure that your project is delivered successfully and on time. Our team often steps in to assist companies or developers who have already begun their migration journey but have found themselves a bit stuck at some point in the process.

Our migration and upgrade engagements offer comprehensive assessment and planning to ensure we're not only delivering the best solution for your business, but are identifying potential risks, offering best practice guidance, and helping you reduce costs as much as possible.

We pride ourselves on offering expertise and transparency throughout planning and implementation, understanding the importance of migration and upgrade to meet business requirements and without affecting stability and security.

What is Payara Accelerator?

Available exclusively to Payara Enterprise customers, Payara Accelerator is a suite of services designed to optimize your Payara Enterprise deployment, migration, or business growth, through customized infrastructure improvements and solutions.

See the full range of services we offer [here](#).

Why Payara Enterprise?

Payara Enterprise is the best application platform for mission critical Jakarta EE (Java EE) and MicroProfile production systems.

Payara Server Enterprise supports reliable and secure deployments of Jakarta EE applications in any environment: on-premise, in the cloud, or hybrid.

Payara Micro Enterprise is the platform of choice for containerized Jakarta EE and MicroProfile microservices deployments. It provides a high performance and highly scalable platform built from the ground up for cloud and containers.

With Payara Enterprise, benefit from support direct from our Engineers, a 10 Year Software Lifecycle, guaranteed monthly releases, bug fixes, and patches, [and more](#).

Our customers include US Coast Guard, Rakuten Card, Hermes, DPD, Fujitsu UK and BMW Group.

The Payara Accelerator Migration and Upgrade Approach

Migration and Upgrade Assessment & Review

All our migration and upgrade engagements begin with a comprehensive review of your current architecture and services, even if you've already begun your migration or upgrade project. By fully understanding your existing applications, infrastructure, and expectations for the project, we can design and deliver bespoke solutions that reduce operational service disruption and maintains the stability of your business-critical applications.

Key elements:

- Review of existing services and applications
- Identify key dependencies
- Identify issues to solve first before migration
- Evaluate project scope (time/complexity)

Roadmap & Implementation

Once we've completed the initial review and evaluation stages, Payara Accelerator will create a simplified migration/upgrade roadmap, outlining the goals as we work to implement your migration or upgrade project. This roadmap helps keep you involved in our implementation, so you can understand our methodology and strategy for fulfilling business-critical requirements.

Our technical team is prepared to handle any challenges that come up during large-scale migrations/ upgrades and are dedicated to ensuring operational continuity throughout your project.

Outcomes

The Payara Accelerator team will implement a migration/upgrade solution that will benefit your organization and its applications. The result will be a migrated/updated environment based on the project requirements.

A summary of all the activities executed in this project will be delivered in a detailed report to you when the project is completed.

How Do I Get Started?

Due to the bespoke nature of our services, contact us for more information and we'll create a custom package to suit you.

About Payara Services

We are a dedicated team of professionals devoted to open source, Java, Jakarta EE and MicroProfile.

As Contributing Members of the Eclipse Foundation, we invest our resources and expertise to improve, innovate and develop open source technologies. We are involved in shaping the future of the industry via our direct contributions to Jakarta EE (Payara's Founder and CEO, Steve Millidge, is a Project Management Committee member) and MicroProfile.
