What is Payara Enterprise?

The best application deployment platform for mission critical Jakarta EE (formerly Java EE) and MicroProfile production systems.

Payara Server Enterprise supports reliable and secure deployments of Jakarta EE applications in any environment: on-premise, in the cloud, or hybrid.

Payara Micro Enterprise is the platform of choice for containerized Jakarta EE and MicroProfile microservices deployments. It provides a high performance and highly scalable platform built from the ground up for cloud and containers.

Why Payara Enterprise?

Enjoy Support Direct From Our Engineers

Choose between 10×5 business hours support for non-mission critical and 24×7 support for major mission critical environments.

10 Year Software Lifecycle

You won't have to upgrade a year or two after you implement a Payara solution.

Develop With a Peace of Mind

Monthly releases, bug fixes, and patches are guaranteed.

You will gain:

- Easy and fast problem solving with direct access to the Payara engineering team
- Access to a private Customer Knowledge Base
- Priority for bug fixes, new features, and enhancement requests
- Azul Platform Core for Distribution included in your contract, Azul's Java SE build for enterprises (Previously Zulu Embedded)
- Access to extra functionalities, like the Upgrade Tool to move easily between Payara versions
- [Try Payara Enterprise for free.](#) Test and evaluate before making any decisions
- **Access to Payara Accelerator, our suite of bespoke consultancy services to accelerate and improve your deployment, migration or business growth.**

What is Payara Accelerator?

Available exclusively to Payara Enterprise customers, Payara Accelerator is a suite of services designed to optimize your Payara Enterprise deployment, migration, or business growth, through customized infrastructure improvements and solutions.

Solutions are designed based on your specific needs. With years of experience both working with the Payara Enterprise and resolving root-causes of complex performance issues, the Payara Accelerator team can provide a comprehensive solution, delivered with confidence and authority.

The Payara Accelerator experts will work with your in-house team, with typical consultancy engagements including migration or version upgrades, configuration and health checks review, monitoring, operational training or performance tuning.

Migration and Upgrades

Payara Accelerator provides hands-on guidance and assessments to ensure your migration or upgrade is successful: from GlassFish, other application servers, from older versions of Payara Enterprise, or from Payara Community to Payara Enterprise.

Our team can help no matter where you are in your migration journey. We create migration roadmaps to lead your organization from where you are now to where you want to be after the migration is complete.

Configuration and Health Check Review

In-house teams may struggle to identify which changes to configuration have to be made to achieve the desired level of performance, stability, availability, and security. We can complete an in-depth review, providing you with the necessary information to ensure your production environment is reaching its optimal potential.

The health checks done to your environment will also identify priority concerns and their solutions, improve diagnostics and minimize threats.

Monitoring

Payara Accelerator can provide a recommended monitoring solution that will increase visibility into your Payara Enterprise system – allowing you to be better prepared to deal with runtime performance issues and optimize your risk management.

We will work with your in-house team to assess your specific needs and objectives and determine the next steps toward designing a production-grade monitoring solution that will benefit your needs.

Operational Training

Your employees get training directly from our expert team of consultants in the operational aspects of Payara Enterprise, to boost their productivity.

Whether you're unsatisfied with your existing production configuration knowledge or looking to enhance it for better stability, Payara Accelerator can provide the best training solution entirely customized to your requirements, roles, and system configuration, delivered using standard online conferencing tools.

Performance Tuning

We work closely with you to discover your performance requirements, combining in-depth knowledge of the Payara Platform with the best-practice tuning methods to assess and adjust your configuration to produce a result that delivers high performance and optimizes your Payara production environment's response.

Our team of experts bring their in-depth knowledge of the Payara Enterprise Platform to help highly optimize your production deployment runtimes for optimum performance.

Customers and Testimonials

“The team is very efficient in lending a hand. Even when the cause is unknown and may not be Payara related, they will help review logs and work alongside us in our investigations. There is never any ‘it’s not us’ mentality, they work with us to find a solution.”

- Zellis

“We have been working with the Payara support team for the last couple of months and, so far, we are positively impressed with the response level and the quality of documentation provided by the Payara engineers. The whole support team is aware of our circumstances resulting in a support service that offers straight forward solutions for our specific issues.”
